

Create engaging & easy to read written and oral patient education material

Project Title	Create engaging & easy to read written and oral patient education material
Project Summary	Help us increase our patients' health literacy by designing and creating written and oral format material about complex medical terms and chronic conditions.
Country	United States
Country/Region of Focus	United States

Project Description

The Ft Belknap Hospital services the Gros Ventres and Assiniboines people in addition to eligible Native American patients on and near the Fort Belknap Reservation. We are looking for creative and motivated interns to help us produce engaging and easy to read medical patient education material. Written material can include newsletters, brochures, pamphlets, flyers, and oral dialogue format material to be played on a local radio show about complex medical terms and chronic diseases.
